

Sustainability Toolkit Launched by the U.S. Department of Labor

Posted on 12/05/2016

The new Sustainability Toolkit was released recently by the U.S. Department of Labor's Employment and Training Administration as part of its technical assistance for Trade Adjustment Assistance Community College Career Training (TAACCCT) grantees. It provides a framework that can be used by a wide range of grantees. The tool kit allows for self-assessment in six areas that support the sustainability of programs and innovations developed by grantees.

To access the TAACCCT Sustainability Toolkit, please visit the [TAACCCT Community of Practice on Workforce GPS](#).

You can also listen to the [TAACCCT Sustainability Toolkit Launch Webinar on Workforce GPS](#). It includes examples of how TAACCCT grantees are actively engaged in sustainability planning.
